connecting the future

## Profit from the right HSIA Solution

TRIAX provides the hospitality sector with a unique platform to supply guests with superior and reliable High Speed Internet Access (HSIA). Our HSIA platform is perfectly suited to deliver a safe, billable and flexible WiFi solution for Hotels, Clinics, Elderly and Nursing homes and is characterised by:

- Low investment need
- Low operating and maintenance costs
- Internet Provider independent
- Full flexibility in creating billable WiFi packages to guests
- No restriction in number of connected guest terminals
- Delivered as a Cloud Service
- Designed for continuous operation
- Active 24/7/365 monitoring and maintenance

### YOUR BENEFITS

- Fit into any environment, from hotel refurbishment to new build, fulfilling your customers' needs and requirements over time.
- Cost efficient cloud platform.
- Reliable and easy to configure, install and operate via browser interface.
- Opportunity to deliver competitive solutions to the hotel segment.
- Combine the HSIA solution with a TRIAX Service Agreement and get access to help and support during setup and installation and after sales service.
- Cloud based solution supporting multiple devices.

### HOTEL BENEFITS

- Possibility of monetising through billable WiFi packages.
- Low operating and maintenance cost.
- Simple Guest login via printed or SMS Ticket to HSIA Guest Portal.
- The responsive Guest Portal has customisable design and online service availability improving direct sale to guests during their stay.
- Intuitive and simple browser based BackOffice to monitor bandwidth consumption, overview system performance and to create WiFi packages, including Guest Ticket management.
- Redundant cloud solution with opportunity for 24/7 surveillance and automatic software maintenance.
- Full PMS Integration.
